SHORT CIRCUIT TARGETS

Short Circuit Target
Because Every Hit Counts

www.romtes.com

Romtes Technologies Ltd is an Israeli-based research, design, and manufacturing firm that has, for close to twenty-five years, specialized in the development and production of interactive live-fire targets and tactical training target systems for military and law enforcement agencies. Incorporating a uniquely Israeli combination of pragmatic innovation, technological common sense, and born-in-battle lessons-learned.

Romtes target systems have revolutionized the training capabilities of Israel's top-tier counterterrorist, special operations, military, and security service teams. These units, among the finest and most experienced in the world, hone their firearms expertise and tactical capabilities on **Romtes** targets. **Romtes** target systems are in use by the elite of Israel's special operations order of battle, including: the "Ya'ma'm", the police national counterterrorist unit; "Flotilla 13", Israel's naval commandos; and, others units and agencies spearheading Israel's war on terror. **Romtes** systems are also the primary training tools used by some of the world's premier Special Forces units, including many of the top units in NATO and United States order of battle.

The centerpiece of the **Romtes** training concept is the patented Short Circuit Target, or SCT. The SCT system provides immediate and instant live-fire feedback, making cost-effective training opportunities that are reliable, accurate and safe.

The **Romtes SCT** system introduces a new paradigm of innovation and technology, once used by only a select and elite few, and now available to a whole new shooting world.

***The best training
targets***
Any range ,anywhere

USED BY **Special Forces** **Now available for all**

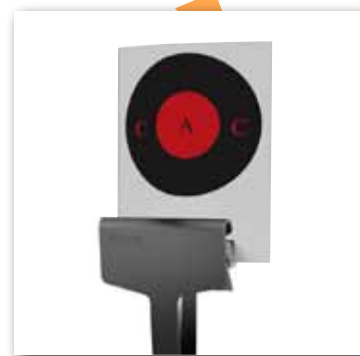

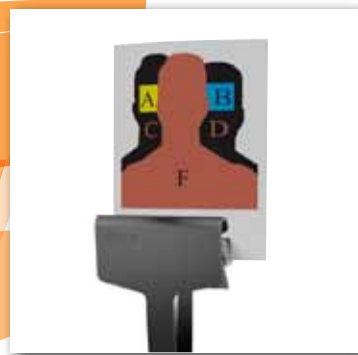

SCT
BY ROMTES
SHORT CIRCUIT TARGET

Training Benefits of the SCT Technology:

- IMMEDIATE FEEDBACK – Saves invaluable training time on the range
- REAL-TIME HIT SCORING – Enables immediate correction and results
- NEAR 100% ACCURACY – Reliable scoring
- HIGH-VOLUME HIT ABSORPTION – Time saving and economical
- MULTIPLE SCORING ZONES – Advanced and focused results
- WIRELESS – Mobile
- TACTICALLY MODULAR – Every training session can recreate real-life scenarios
- DATABASE – Continuous shooting skill monitoring
